Dear Mr Bar-Ilan

Nemesysco Layered Voice Stress Technology

The Special Investigating Unit (**SIU**) is mandated to investigate corruption and serious maladministration in state institutions in South Africa. It is a Schedule 3 entity in terms of the PFMA and is an independent entity in the Department of Justice and Constitutional Affairs. The SIU is accountable to Parliament and the President.

The Internal Integrity Unit (**IU**) of the SIU has been using Nemesysco Layered Voice Stress Technology as an investigative tool since 2010. The technology has been extensively used in the IU's screening of personnel as well as in internal investigations.

The IU wish to confirm our satisfaction with the technology developed by Nemesysco and is pleased to serve as a reference if so required.

Yours sincerely

Roxane Ferreira

Acting Head: Internal Integrity Unit
Special Investigating Unit.
